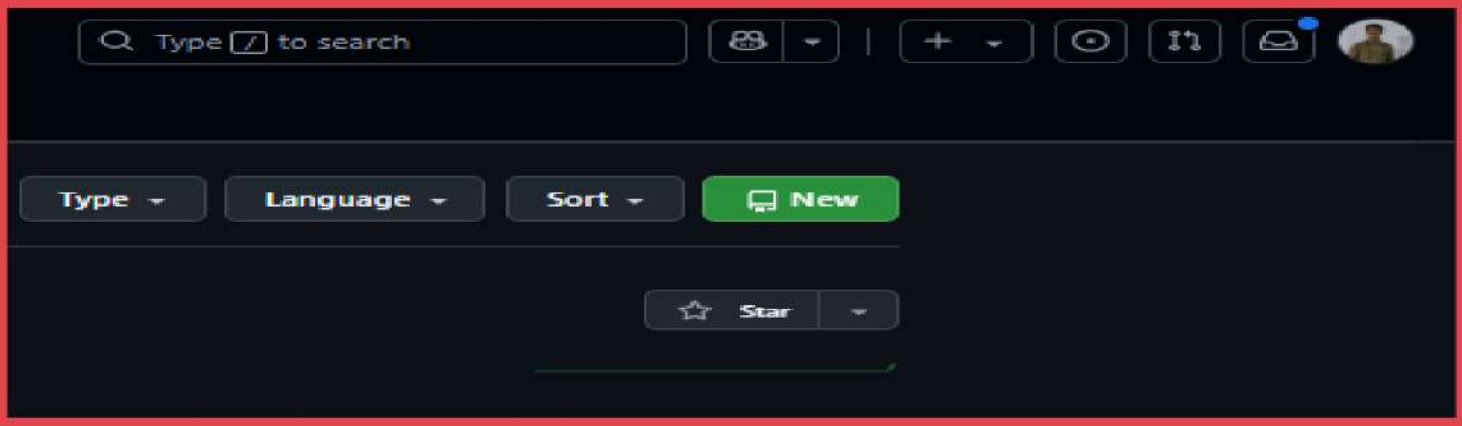
How to upload project on Github ?

SIMPLE STEPS

Open ur Github account

https://github.com/pariveshrohilla

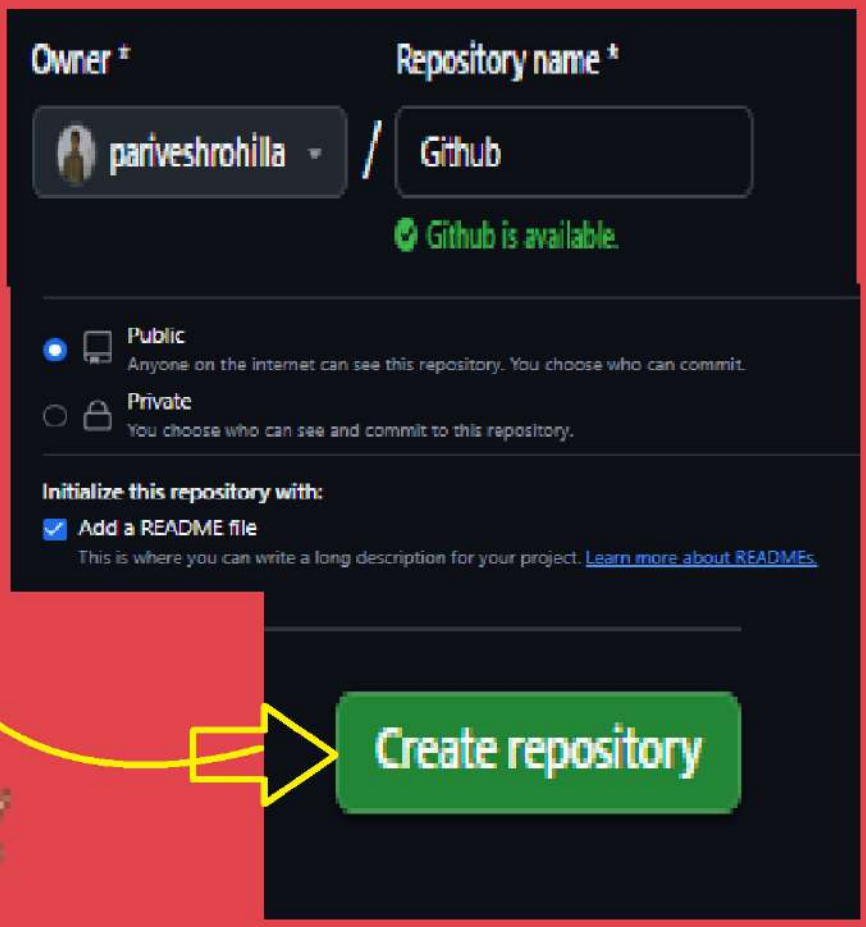
Click On New Reposotry



Give It A Name,
Make It Public,
Add Readme

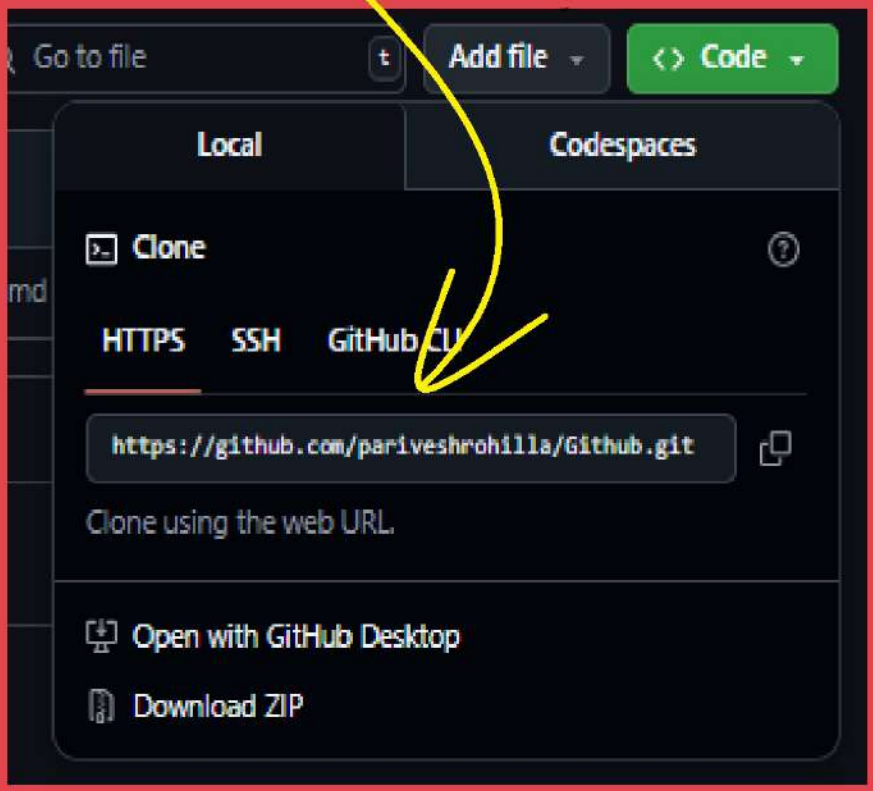
&

Click on Create



```
git init
git commit -m "first commit"
git add . (to add all files)
git remote add origin https://github.com/pariveshrohilla/Github.git
git push -u origin main
```

Type these in cmd into your project file



~ Finally open Your github repo and see the changes .
~This is helpful when you want to add many folder in folder files at once.
~You can also use it in VS Code or any code editor
